

Relias Competency Evaluations

A digital solution to help identify KSA gaps

Quickly identifying staff competencies has never been more important. Experienced clinicians are retiring or changing careers while new, inexperienced staff fills the void.

Compounding this are outdated, time-intensive paper evaluation processes that are difficult to track and prone to errors — making it harder to identify knowledge, skills, and abilities (KSA) gaps among individuals and teams.

With the Relias Competency Evaluations tool, that time intensive, disorganized task is now digitized and automated. This mobile-friendly solution allows competencies to be tracked in real-time.

KSA gaps with any individual or team are identified quickly and mitigated with personalized training. Housing everything in the Relias Platform gives you confidence knowing you're always prepared for audits and your clinicians are consistently providing the absolute best care.

What Can It Do?

Evaluate staff members where they are with a mobile-optimized interface.

Create custom or select pre-loaded evaluations.

Choose from a variety of rating scales.

Enroll staff, and track evaluations in real time.

Set due dates for completion.

Observe and attest with an easy-to-use interface.

Leverage Relias' extensive libraries to address KSA gaps.

Ready to reduce paper and go digital?
